Height: 5 feet

Spread: 5 feet

Sunlight: ◐ ●

Hardiness Zone: (annual)

Description:

A sweet fuchsia variety featuring dainty red nodding flowers that contrast the mass of green foliage; very attractive to hummingbirds; a dense self supporting round shrub that has shown to be resistant to mites

Ornamental Features

Campo Molino Fuchsia features dainty nodding red trumpet-shaped flowers along the branches from late summer to early fall. Its pointy leaves remain green in colour throughout the year.

Landscape Attributes

Campo Molino Fuchsia is a dense multi-stemmed annual with a more or less rounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Campo Molino Fuchsia is recommended for the following landscape applications;

- Accent
- General Garden Use
- Container Planting

Planting & Growing

Campo Molino Fuchsia will grow to be about 5 feet tall at maturity, with a spread of 5 feet. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Campo Molino Fuchsia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
